

PRECINOX

MACHINING SERVICE WITH
ADVANCED BLANKS, AS
CLOSE AS POSSIBLE TO THE
FINAL COMPONENT

.....

PX PRECINOX

With over 40 years' experience and mastery of the entire precious metals transformation chain, PX Précinox is today a key player in the watch and jewellery sector.

.....

PRECIOUS METALS

- RJC COC CERTIFIED GOLD ALLOYS, FAIRMINED, PX IMPACT®
- ALLOYS Au / Pt / Pd / Ag, ALL COLOURS
- CUSTOMISED PRECIOUS METAL ALLOYS

PRODUCTS

- SIMPLE OF SHAPED BLANKS, FROM BILLETS OR SHORT BARS, DEPENDING ON PRODUCTION VOLUMES

A range of high-performance production tools gives us great flexibility for small, medium and large production runs.

BENEFITS

Blanks as close as possible to the finished dimension, with an allowance of 0.20mm.

- LESS MATERIAL USED
- FEWER CHIPS
- LESS MATERIAL HELD

Machining as close as possible to the finished part can reduce the precious metal feed rate by up to 75%.

The machined parts guarantee dimensional accuracy, which facilitates reworking for subsequent finishing operations.

SERVICES

- PROACTIVE APPROACH FOR 3D MODELLING OF BLANKS, AS CLOSE AS POSSIBLE TO THE FINISHED PART

EXAMPLES OF APPLICATIONS

- BLANKS FOR BOXES, BEZELS, BACKS, HORNS
- ÉBAUCHES BRACELETS, FERMOIRS, BOUCLES, ARDILLONS
- ÉBAUCHES MASSES OSCILLANTES
